

OUTDOOR Visitation

Food & Drinks are not allowed during visitation. They may be brought for your loved one to enjoy in their room after your visit. Everyone must wear masks at all times during your visit.

distancing, hand hygiene and use of personal protective equipment (PPE).

- The county positivity rate is not considered at this time for outdoor visitation.
- The number of visitors allowed at one time is dependent on the visitation schedule as we must practice social distancing. The planned number of visitors is **TWO**. If family/friends would like to bring more than **TWO** people, including children, then it must be scheduled with the actual number of visitors coming to visit the resident/patient/client so that the Facility can adapt and adjust the visitation area for appropriate social distancing. If family/friends bring more people than scheduled and the visitation area cannot be modified or monitored appropriately then the extra number of visitors cannot visit at that time. The Facility will get a new visit scheduled for those family/friends.
- Visitation is scheduled for **45 minutes**. If family/friends would like to visit for a longer period of time it must be specified at the time of scheduling. Length of visitation is dependent on other visitation schedules, staff available for monitoring and social distancing space. It is imperative that visitation time is planned carefully to meet all safety criteria. If the Facility is unable to accommodate a lengthier visit as requested, at that time, the Facility will provide alternative dates/times to the family/friends.
- **All visitors must sign an Attestation Form**
- All visitors are screened prior to access, go through the sanitization station, and must wear a facemask for the duration of their visit. The Facility must provide a facemask for the visitor to ensure universal source control.
